We are glad that you are interested in our WooCommerce Bitcoin plugin. Installing it into your online store is quite easy, so please follow the steps below for a swift and smooth start.

First and foremost, you will need to sign up for a free account on BTCPayJungle, use our main website: <https://btcpayjungle.com>

The installation of our WooCommerce Bitcoin module is quite easy. In order to ensure that BTCPay Bitcoin gateway is working properly on your website, we will go over these two quick steps:

1. Setup your API credentials on BTCPayJungle.com
2. Install the BTCPAY Bitcoin plugin inside WooCommerce.

To create a set of API credentials, login to your BTCPayJungle account, inside your store settings you find listed on the menu, Access Token and Create a new token, that's it.

WooCommerce Bitcoin plugin installation

Please note, this guide was created using WordPress 4.7.4, but is also useful for installing older or upcoming versions.

1. Login to your WordPress admin panel and go to Plugins > Add New.
2. In the Search Plugins field, type in “BTCPay”. When the BTCPay for WooCommerce plugin is displayed, click “Install Now” (if asked, enter your FTP credentials).
3. After the plugin is installed, click “Activate”.
4. Go to WooCommerce > Settings > Checkout > BTCPay and then click the check box next to “Enable Bitcoin payment via BTCPay”. If needed, change the Description and the Title according to your preferences.
5. Enter your API credentials on the WooCommerce configuration page.
6. If you set the Receive Currency to BTC (Bitcoin), then verification ID is not needed. At this point, you can also configure how BTCPay order statuses will correspond to WooCommerce order statuses. Leave the default options if you are not sure.
7. Finally, click “Save changes”, and you are good to go!
